Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments, with respect to the rejection(s) of claim(s) 1-7 under Ueyama have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of newly found prior art.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Englund et al. (5197474). Englund et al. disclose a patient bed mechanism for MR examination, with a bed adapted to receive an examination subject and is movable into and out of the examination space (abstract), a coil unit which is movable into and out of the examination space and is coupled to the bed for moving the coil unit relative to the examination space with the coil unit joined to the bed (col. 4 lines 27-55). The coil unit is received outside of the examination space in a cart or the lower bed with the receiving device is attached to the scanner (col. 4 lines 46-55, col. 5 lines 3-15). The device includes electrical connections for supplying power to the coil unit (col. 4 lines 56-63).

Art Unit: 3737

The system further includes a control device for guiding the coil unit through the examination space and the patient bed (22-26).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6148229- discloses a movable coil and bed structure (col. 5 lines 31-35).

4339716- discloses a movable coil structure relative to the patient bed (col. 7 lines 3-15).
